

# Tom Faulkner

**Tom is part of Cleveland's mechanical and electrical team, where he works alongside fellow partner Michael Williams to provide clients with in-depth strategic advice across a wide range of technology areas.**

Tom's physics background means that he has worked with various technologies during his years at Cleveland. He has particular experience in data telemetry systems, machining technology and hi-tech medical and laboratory equipment.

Tom's hands-on approach allows him to gain a thorough understanding of his clients' ideas and provide proactive and comprehensive advice on patent and design issues. His clients like his grounded and considered manner.

Tom Faulkner – energising ideas for Cleveland clients since 1995.
