

Peter Arrowsmith

As a member of the mechanical and electrical team, Peter provides patent and design advice to a range of global clients, alongside Michael Williams and Tom Faulkner.

Peter's background in physics, optics and photonics provides a flexible platform for dealing with a range of technologies from new mechanical configurations to advances in electronics and software. Peter is particularly interested in computer implemented inventions.

Peter's clients benefit from his in-depth understanding of their businesses and their specific intellectual property issues, which enable him to provide strategic advice in a commercial context. His clients particularly like his methodical and focused approach.

Peter Arrowsmith – energising ideas for Cleveland clients since 2005.
